CO-OP[®] DIESEL FUEL

CO-OP DIESEL FUEL

CO-OP DIESEL FUEL
IS THE FUEL OF CHOICE
FOR ANYONE WHO
OPERATES FARM
EQUIPMENT OR
DIESEL TRUCKS.

DESCRIPTION

Diesel equipment operators need a fuel that delivers power and fuel economy. **CO-OP DIESEL FUEL** is refined to provide maximum power and excellent fuel economy under heavy use conditions. CO-OP Diesel Fuel also helps reduce down time and guard against expensive repairs, adding extra savings to a well-rounded maintenance program. CO-OP Diesel is the fuel of choice for agricultural and commercial applications.

FEATURES & BENEFITS

- **CETANE NUMBER/DENSITY**
CO-OP Diesel Fuel is formulated to have a cetane number that results in fast starts, a smoother running engine and increased power. As well, the fuel burns more completely - it doesn't go up in smoke. CO-OP Diesel Fuel provides the power for efficient diesel equipment operation.
- **WINTER OPERATION**
During winter, when machinery is either inactive for long periods or must be used in spite of cold weather, engines require added protection. CO-OP Winter Diesel Fuel provides protection from harsh environmental conditions. The rust inhibitors and emulsifiers guard against fuel system corrosion caused by condensation. CO-OP Winter Diesel Fuel has a low cloud point to prevent the formation of waxes (solids) or crystallization in the diesel fuel.
- **LOWER SULPHUR CONTENT**
Sulphur in fuel combines with water to create sulphuric acid which either goes out the stack as exhaust or into the crankcase to cause engine corrosion and wear. The lower sulfur content of CO-OP Diesel Fuel (less than 0.05%) extends diesel engine life, reduces maintenance costs and is more environmentally friendly than high sulphur diesel fuels.
- **LUBRICITY**
CO-OP Diesel Fuel is formulated to provide adequate lubricity. Lubricity is the ability of the fuel to provide lubrication of fuel system components. CO-OP Diesel Fuel has been tested for lubricity in the newest testing procedures with clear passing results. With CO-OP Diesel Fuel, there is no need to add oil, expensive lubricity additives or fuel conditioners - GUARANTEED!
